

- 1990 - the company TIMST was established by the Sikoski family;
- 1994 - production of wood fueled stoves started, license from the French company France Turbo;
- 1999/2000 - the first own designed stove and fireplace type stove were launched on the market;
- 2001 - the company moved in new the factory;
- 2005 - the company started production and installation of fireplaces according to customer specifications;
- 2007 - a showroom was opened in Skopje;
- 2007 - the first prototype of the pellet fuel fireplace was designed.

- TIMST is a family owned business, which ensures flexibility in the operations and personal approach to the business.
- Our mission is to provide our clients with optimal solutions for economical and environmentally friendly space heating and further strengthen our position of a recognizable producer of high quality solutions for space heating.
- Our mission underlines the importance of the customer. The whole staff in the company, starting from the production, through commercial department, marketing and the technical staff, is trained to reply positively and proactively to the customer demand. For TIMST, the customers are the reason to exist.
- We employ competent and dynamic people throughout the company who solve the client's problems.
- We consider ourselves progressive in the business, but with a conservative approach, underlining the quality of our services, and continuous research for innovative products that satisfy clients' needs.
