

PHI GENERAL HOSPITAL KUMANOVO

Director: Dr. Snezhana Zaharieva

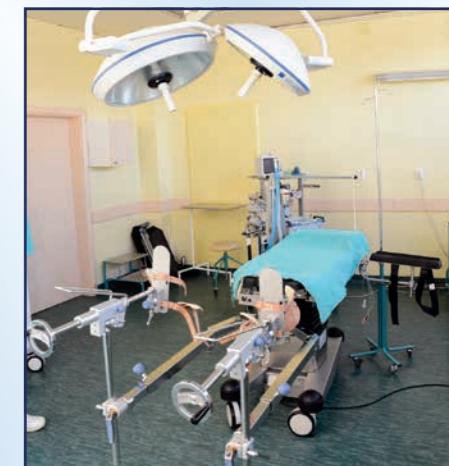

Dr. Snezhana Zaharieva was born in 1963 in Kumanovo, where she finished primary and secondary education. She finished Medical Faculty in 1988 in Skopje. She has been working as a doctor since 1989 in the children's dispensary, the emergency medical assistance, and the general outpatient clinics in Medical Center Kumanovo. She completed specialization in Anesthesia and Resuscitation in the period from 2001 until 2005. Since 2005 she has been working as an anesthesiologist in the PHI General Hospital Kumanovo. She is a member of the Association of Doctors for Anesthesia, Resuscitation and Intensive Care of the Republic of Macedonia, and a participant in several international congresses of anesthesiology. She completed education at the University Clinic Cerrahpasa in Istanbul, at the Department of Intensive Care and Gynecology. Since August 4, 2017, she has been appointed Director of the PHI General Hospital Kumanovo.

The PHI General Hospital Kumanovo exists since 2005. The oldest facility of the hospital is an old building of otorhinolaryngology and the Department of Ophthalmology – foundation of Nikola Spasikj. Situated in the central city area, it provides healthcare services of secondary type – specialist-consultative and hospital services, to approximately 200.000 residents from Kumanovo and other municipalities. We can rightly say that we function as a regional hospital because the residents from the northeast region of Macedonia are provided with healthcare services in our institution.

We are organized in several working units that are interconnected, as follows; working units for specialist-consultative activity and hospitalization:

- ◆ Working unit for surgical diseases, orthopedics and urology
- ◆ Working unit for anesthesia and resuscitation with intensive care
- ◆ Working unit for gynecology and obstetrics with neonatology
- ◆ Working unit for internal diseases
- ◆ Working unit for diseases of the ear, nose and throat
- ◆ Working unit for eye diseases;
- ◆ Working unit for neurology
- ◆ Working unit for psychiatry
- ◆ Working unit for infectious and parasitic diseases

Specialist-consultative activity is performed by:

- ◆ Working unit for emergency medicine – emergency center
- ◆ Working unit for dermal and venereal diseases
- ◆ Working unit for physical medicine and rehabilitation
- ◆ Working unit for pathological anatomy with forensic medicine
- ◆ Working unit for laboratory activity
- ◆ Working unit galenic laboratory
- ◆ Working unit drug depository
- ◆ Center for Diabetes as a subunit of the Working unit for internal diseases

The following working units are our logistic support:

- ◆ Working unit for legal, general and personnel matters
- ◆ Working unit for economic-financial operations
- ◆ Working unit for servicing-technical service
- ◆ Working unit patient transport vehicle fleet

Every year we try to improve the quality and number of healthcare services by introducing new diagnostic methods and surgical interventions, whereby our patients are provided with health services for which for many years they have been referred to other healthcare institutions.
