

# Communal Public Enterprise **NISKOGRADBA** Bitola

**General Manager: Mr. Kire Krstevski**  
Master of Economics

**CPE NISKOGRADBA – Bitola** is a communal public enterprise which was established in 1954 with a Decision of the Assembly of the Municipality of Bitola. Within its scope of work the public communal enterprise performs the following activities: construction of communal facilities for fluids, construction of power lines and telecommunication lines, construction of hydro-construction facilities, wastewater removal and disposal, and related activities. The enterprise performs its activity permanently, publicly and transparently. The enterprise is managed by the following bodies: Board of Directors, Supervisory Board and a Director. For the purpose of profit increase and development of the enterprise, the Board of Directors adopts a Work and Development Program, upon a proposal by the Director. CPE Niskogradba – Bitola has 152 employees, 21 of which have higher vocational education. The internal organization of the enterprise is set in a way that it can meet the requirements for rational use of the means of labor and an attainment of more favorable results in the working process. The organization is divided into three basic parts which have different functions, as follows: Sector of Sewerage Facilities, Installations, Streets, Roads and Machinery, Sector of Finance, Accounting and Commerce, and Sector of General and Legal Affairs and Human Resources. With hard work and an excellent management team, in 2012 the enterprise overcame the loss of 30 million denars and finished the year with a positive financial result, and it has been following this trend until the current year. In addition, more than 50 new job positions have been provided, according to the needs of the enterprise.

In the winter period, the winter service successfully organizes and realizes its obligations, and with the commencement of the construction season it is already working on the accomplishment of major projects. The current works include a large project in the area of the old military barracks, that is, in the complex of the Army of the Republic of Macedonia, where the CPE Niskogradba Bitola installs the sewerage network. In addition, there are ongoing works on the sewerage network on the street "Pitu Guli", installation of stormwater sewerage network in Dolno Orizari and the street "Apostol Zdravevski". During the current year we also performed drainage of the City Stadium, cleaning of the open channels, the sewerage on the street "Fahri Ibrahim" and the street "Rashanec", "Ljubojno", "Kiril Majski", etc. For next year, works contracts have already been provided with a value of more than 70 million denars. The enterprise disposes of machinery for performance of works which needs to be constantly modernized and renewed. For this purpose, we perform procurements of all fixed assets which will contribute for faster and more efficient performance of construction works and all undertakings we perform. In 2016 new mobile machine was procured – backhoe, which is used for excavation of trenches, mostly deeper than 5 meters. This investment will facilitate the performance of the work assignments, and more results will be achieved in a much shorter period. At the same time, the PCE Niskogradba is certified with the certificates for: Quality Management System ISO 9001-2008, Environmental Management System ISO 14001-2004, and Occupational Health and Safety Management System OHSAS 18001-2007. All of this suggests that the PCE Niskogradba Bitola is prepared to respond to all challenges and demands of the citizens.
