

# Public Enterprise OHRIDSKI KOMUNALEC Ohrid

**General Manager  
Mrs. Elena Skrcheska**

PE "Ohridski Komunalec" Ohrid is a public utility enterprise founded by the Municipality of Ohrid and the sole provider of utility services gathering, transportation and disposal of communal waste at the territory of Municipality of Ohrid, maintaining public hygiene and greenery. Carrying out its everyday activities, PE Ohridski Komunalec acts in accordance with the environmental protection standards, focusing on the global trend of reduction of generated waste. It strives to select and recycle the waste from the entire municipality and use the waste as a secondary raw material and fuel, as well as to record, monitor and raise public awareness. In this direction, implementation of the project "Ohrid – city without communal waste", which includes construction of a waste recycling plant, is planned. Even more areas outside the city, where cleaning the public traffic areas, i.e. utility service gathering, transportation and disposal of waste, is carried out, are included with the dimensioning and dynamics of the services.

Maintenance of public cleanness means organized and continuous cleaning, washing, sweeping, and clearing of the so-called illegal dumps of construction rubble and waste from dynamic areas, and emptying the waste-baskets on the public dynamic areas. The dimensioning of these activities meets the needs of the city and the population, as well as the special needs which Ohrid has as a tourist center. With open communication and transparency, we strengthen the mutual trust and partnership with our end users – the citizens.

As far as maintenance of public greenery is concerned, our priority is horticultural arranging of Ohrid with numerous defined and projected dens in the city park and on the entire territory of Municipality of Ohrid. With the rich variety of seedlings from the greenhouses, we offer preparation of horticultural solutions for the needs of all interested citizens and legal entities. We implemented the improvement of the everyday life of all of fellow citizen with the beauty that flowers and plants bring into our lives and we continue to implement it with the project "Ohrid – city of the flower 2012". Plants are "lungs" of the cities which protect us from winds, dusts and they present small oases of health around us. That's why, with this project, we'll turn our city into a "green one" from ecological and aesthetical point of view, into an attractive place for stay of all our fellow citizens and tourists.

With the implementation of the eco-campaigns, we encourage the youngest population of our city to love the environment, the greenery and our city. We arrange school and kindergarten yards, we implement and support eco-campaigns in which employees of the public enterprise and students take part, we prepare eco-pamphlets, and we participate in talk shows.

The activities and the work in PE Ohridski Komunalec - Ohrid are carried out through the following work units:

- ◆ Work Unit "Communal Hygiene"
- ◆ Work Unit "Parks and Greenery"
- ◆ Work Unit "Mechanization"
- ◆ Work Unit "Joint Services"
